PROTECT YOUR HOME AND FAMILY

SECURITY

The safety of you and your family is so important. Your personal possessions are important too: your home, cars, garage, garden, jewelery and shed should all be protected. Protecting your family and what you have worked so hard for is now easier than ever, with one of our professionally installed, easy-to-use, CCTV systems.

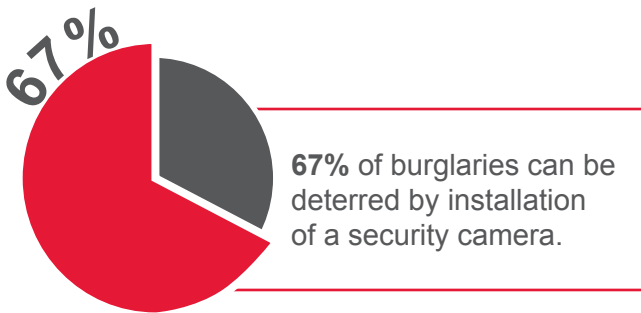

INTEGRATION

LILIN cameras integrate with the market leading Home Automation brands, enabling quick and easy viewing of live video from cameras on TV's, tablets or touch screen controls. The ultimate in control integration will allow control of video playback on recorded content, selecting different camera views and freeze frame.

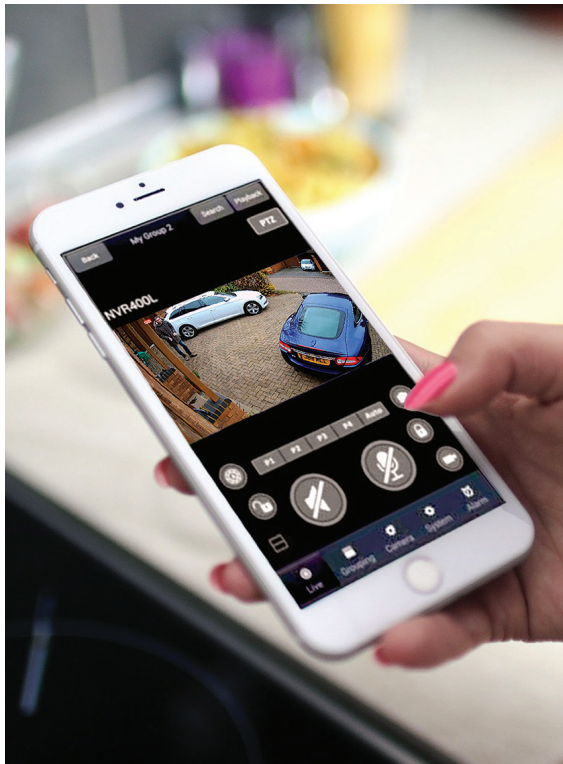

MONITOR IT YOURSELF

In almost every Smart Home there will also be an intruder alarm system, however a monitored alarm system is no guarantee of police response and an unmonitored one might be nothing more than a nuisance. Using internet connected cameras enables you to verify alarm activations live, if you then call the police because there is an intruder this is considered both a verified alarm and a crime in progress and is more likely to elicit a police response.

FEATURES

The control features available allows you to move cameras, zoom, and select presets directly from automation devices' interface. Whether pulling a 16-camera view onto the TV for constant viewing or checking in on the kids from an iPhone during a lunch break, LILIN's integration with home automation systems makes safety, security, and peace of mind the simplest of solutions.

Cameras

Indoor or outdoor, 'Discreet' or 'Fully Visible' night time vision.

NVR

Record what your cameras see 24 hours a day.

Installation

Professionally installed by our dedicated security installation team.

Smart Viewing

View your cameras from your smartphone or tablet.

CAMERA OPTIONS

LILIN's Intelligent Video Surveillance (IVS) also offers enhanced video analytic features such as advanced motion detection in a customized area, face detection, object counting, alarm detection, and many more.

PANORAMA

Typically internal cameras, the Panorama series offers a 360° recording, ideal for an open area.

DOMES

Dome cameras are ceiling fitted and suitable for either internal or external. They offer a stylish and compact design that can blend well with the area of installation. With tinted glass surrounding the dome, it can be difficult to see the camera inside and which direction it is facing.

BULLET

The most common style of camera, it's recognisable shape works as a deterrent for vandals and criminals. Bullet cameras are typically fitted to the wall, but can also be mounted to the ceiling.

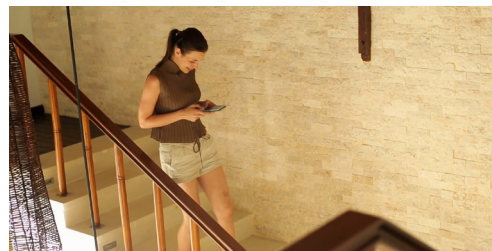

IVS FEATURES:

TAMPER DETECTION

An alarm is triggered when someone attempts to cover, vandalise or move the camera.

MOTION DETECTION

Detects motion in a scene, the area can be customised and the sensitivity adjusted.

Whatever your scope of works are, please give us a call or visit our website to see what we can do for you.
