The Origin Advantage

A blend of incredible sound quality and artistic design is what sets the loudspeakers at Origin apart. Having created the first, modern, in-wall speaker in 1976, the team at Origin has spent decades perfecting the concept. Fill your life with the finest music and be confident in the fact that your speakers will continue to perform for years to come.

Origin Landscape Outdoor Speaker Collection

Filling your outdoor environment with quality music that appears to come from nowhere is now a very real expectation. The Landscape Series includes two models of satellite speakers that can be hidden away in flowerbeds and planters. To create an even more dramatic presence, the Series includes high performance subwoofers that are buried in the ground and completely fill out the bottom end. They will project incredible sound from exterior walls, under eaves, on pillars and architectural elements or even freestanding on exterior furniture.

Seasons Outdoor Speaker Collection

Taking entertainment outside is a balance of audible accuracy, dispersion and power. The Seasons Outdoor Collection utilises a unique driver configuration in a triangular cabinet. The 60 series models feature active woofers and tweeters and dual passive radiators firing off the back two sides. This means substantial bass and greater volume levels to fill the garden, deck or pool area with impressive sound. The collection is available in eight models including two that deliver both stereo channels from a single enclosure.

Acoustic Landscape Audio System

Change your outdoor lifestyle. Acoustic Landscape provides full coverage across large garden spaces, meaning you can take the music with you whenever you venture outside. The Landscape audio system provides full solution that evenly covers your garden with sound. The camouflaged 4" Satellite speakers and 8" subwoofer provide quality tone and coverage, turning the whole outdoor space into a sweet spot without disturbing the neighbours. Acoustic Landscape is high quality and simplicity epitomised.

Acoustic Landscape[™]
COLLECTION

EVERYTHING BUT YOUR TYPICAL OUTDOOR SPEAKERS

The Acoustic Landscape system can be set up and running in a matter of minutes with just a standard receiver or amplifier with two available channels and some four conductor cable. Once installed, it preserves the natural beauty of it's surroundings while delivering a rich and even sonic performance.

All-weather enclosures to perform even under the most extreme conditions

Compatible with any standard 2-channel Amplifier

4" two-way speakers with rugged ground stakes

8" burial subwoofer for deep bass

Designed with an earth colour to remain hidden from sight within plants and foliage.
